

Daoud Mohammed

Professeur de l'Enseignement Supérieur

Laboratoire de la Physique de la Matière et du Rayonnement.
Département de Physique, Faculté des Sciences,
Université Ibnou Zohr, Agadir.
Téléphone: 06 68 06 43 93 / 05 28 22 09 57
Fax: 05 28 22 01 00
email: m_daoud@hotmail.com

Biographie:

Mohammed Daoud a obtenu le doctorat d'université en physique théorique de l'université Claude Bernard Lyon-I et le doctorat d'état en physique mathématique de l'université Mohamed V (Rabat). Il est professeur de l'enseignement supérieur au département de physique de la faculté des sciences de l'université Ibnou Zohr (Agadir). Il assure actuellement la direction du laboratoire de la physique de la matière et du rayonnement.

Il a visité comme chercheur, professeur invité ou membre associé plusieurs universités ou centres de recherches à l'étranger (Allemagne, Canada, Espagne, Etats Unies, France, Italie, Pologne). Il est responsable ou partenaire de plusieurs projets de recherche aussi bien au niveau national que international.

Le professeur Mohammed Daoud est membre fondateur du groupement national de recherches-information quantique (GNDR-IQ). Il est actuellement le coordonnateur national de ce groupement, qui regroupe la majorité des chercheurs nationaux, travaillant en physique quantique de l'information. Il est vice président et membre fondateur de la Société Marocaine de Physique Mathématique. Il est membre fondateur de plusieurs réseaux scientifiques nationaux (RNPT, RENAPT, RHEMAP) et internationaux à l'instar du "ICTP Regional Network: Novel Approaches to Mesoscopic Phenomena" regroupant les pays: Arménie, Brésil, Turquie et Maroc.

Il a supervisé plusieurs travaux de recherche scientifique, thèses de doctorat et divers programmes de formations approfondies en physique théorique et mathématique. Il a publié une centaine de travaux de recherches originaux parus pour la plus part dans des revues de renom.

Les travaux de Mohammed Daoud en physique quantique portent sur les théories des processus d'interaction rayonnement-matière, la théorie de la cohérence quantique et les systèmes des états cohérents et intelligents, l'effet Hall quantique, les statistiques quantiques fractionnaires, la supersymétrie fractionnaire, les phénomènes d'intrication dans les systèmes quantiques, la cryptographie quantique et le calcul quantique.

Les travaux de recherches de Mohammed Daoud en physique mathématique portent sur la théorie des groupes et leurs représentations pour tirer profit des symétries dans les systèmes quantiques. Il s'est intéressé également aux algèbres quantiques pour étudier les symétries déformées. Il a utilisé aussi les méthodes de la géométrie algébrique et symplectique pour expliquer la transition quantique-classique et fournir une description géométrique des phénomènes de décohérence quantique.

Mohammed Daoud est membre de plusieurs comités d'experts scientifiques (CNRST-Maroc, CONICYT-Chile, CNCS-Roumanie). Il est membre éditeur de Journal of Physics A: Mathematical and general et Africain journal of Mathematical Physics. Il est aussi rapporteur pour le compte de nombreux journaux internationaux.

Mohammed Daoud a organisé plusieurs conférences nationales et internationales en collaboration avec des partenaires nationaux et étrangers. Il a initié un cycle régulier de rencontres thématiques (sous forme de mini écoles) pour que les chercheurs marocains puissent se rencontrer et discuter les récents développements en physique quantique de l'information, physique théorique et physique mathématique. Mohammed Daoud dispose de nombreuses collaborations avec des collègues marocains et étrangers autour de différentes thématiques relevant de ses domaines d'expertise.

Mohammed Daoud a été élu, en 2009, membre associé régulier au centre International de Physique Théorique (ICTP) et a été nommé, en 2012 par le ministre de l'enseignement supérieur, expert au Centre National de la Recherche Scientifique et Technique. Il est membre de sociétés scientifiques savantes comme la prestigieuse "International Association of Mathematical Physics".

CURRICULUM VITAE

Daoud Mohammed

46 years, married, 1 daughter
Professor at University Ibnou Zohr
Department of Physics
Faculty of Sciences
Agadir, Morocco.
email: m_daoud@hotmail.com
Phone number: 06 68 06 43 93.

Degrees

1988 *Licence és Sciences Physiques*, University Mohammed V, Rabat, Morocco.

1989: *Diplôme d'études approfondies* (DEA) in Theoretical Physics from University Claude Bernard Lyon 1, France.

1992: *Diplôme de Doctorat d'université* in Theoretical Physics from University Claude Bernard Lyon 1, France.
Processus d'absorption multiphotonique pour des ions de transition et méthodes d'adaptation à la symétrie.

1997: *Diplôme de Doctorat d'état* in Mathematical Physics from University Mohammed V, Rabat, Morocco.
Rôle des symétries dans les processus multiphotoniques et les statistiques quantiques intermédiaires.

Academic positions

1993-1995: *Attaché temporaire à l'enseignement et la recherche* (ATER), University Claude Bernard Lyon 1, France.

1995-1997: *Maître assistant*, University Ibnou Zohr, Agadir, Morocco.

1997-2001: *Maître de Conférences*, University Ibnou Zohr, Agadir, Morocco.

2001-2006: *Professeur de L'enseignement Supérieur-Grade A*, University Ibnou Zohr, Agadir, Morocco.

2006-Now: *Professeur de L'enseignement Supérieur-Grade B*, University Ibnou Zohr, Agadir, Morocco.

Main Research Areas

Quantum Information Theory.

Quantum entanglement, Quantum discord, Decoherence of quantum systems, Quantum cryptography, Quantum teleportation, Quantum computing, Quantum codes.

Quantum Mechanics and Quantum Optics.

Exactly solvable quantum models, Quantum coherence and decoherence theory, Light-Matter interaction, Multi-photon absorption processes of atoms and ions.

Symmetry Methods in Quantum Physics

Finite and compact groups and representation theory applied to nuclear, atomic and molecular spectroscopy. Lie and super-Lie algebras and symmetries in quantum physics.

Quantum Coherence Theory in Quantum Physics

Coherent states and Intelligent states for exactly solvable models. States minimizing the Robertson-Schrödinger relation. Analytical and algebraic realizations of coherent states. Quantum-classical transition

Geometric Methods in Quantum Physics

Non commutative geometry in condensed matter physics. Quantum Hall effect in higher dimensions. Anyons, parastatistics and fractional spins emerging from the topological effects in quantum systems.

Mathematical Physics

Symmetries in Physics. Groups and representations theory. Lie algebras and quantized Lie algebras for quantum physics. Z_2 -graded algebras. Symplectic, Riemannian and Kählerian manifolds in quantum physics and quantum field theory.

Supersymmetric Methods in Quantum Physics

Supersymmetric quantum mechanics. Supersymmetric quantum states. Fractional supersymmetric systems and generalized spin systems.

Other Research Interests

Supersymmetry in particle physics.

Quantum gravity.

Topological effects in physics.

Cosmology.

String theory.

Quantum phase transitions and topological orders.

Teaching and tutoring activities

Teaching

Undergraduate (DEUG): Classical and Quantum mechanics, Electromagnetism, Thermodynamics.

Graduate of maitrise: Quantum mechanics, Nuclear physics, Atomic Physics, Quantum optics.

Graduate of Master: Group theory, Relativistic quantum mechanics, Quantum field theory, Introduction to Supersymmetry, Gauge theories. Mathematical methods for physics.

Supervising Phd Thesis

Supervisor of the Phd thesis of M. Mansour "Star-Produits et déformations quantiques" (1999).

Supervisor of the Phd thesis of J. Douari concerning "Anyons, statistiques fractionnaire et groupes quantiques." (2001).

Supervisor of the Phd thesis of A. Jellal concerning "Effet Hall fractionnaire et Symétries quantiques" (2003).

Supervisor of the Phd thesis of A. H. El Kinani concerning "Etats cohérents et intelligents généralisés pour des systèmes quantiques exactement solubles" (2005).

Supervisor of the Phd thesis of A. Hamama concerning "Théories des champs non commutatives et effet Hall quantique fractionnaire" (2008).

Supervisor of the Phd thesis of A. Ouelldguejdi concerning "Géometrie symplectique en physique quantique de l'information" (Expected for June 2013)

Supervising Phd Thesis: in progress

Supervisor of the Phd thesis of R. Essaber

"Mesures quantiques de l'intrication en théorie quantique de l'information: Aspects algébriques et géométriques"

Supervisor of the Phd thesis of W. El Kaydi

"Intrication dans les systèmes d'états cohérents"

Supervisor of the Phd thesis of S. Seddik

"Codes correcteurs d'erreurs en théorie quantique de l'information"

Supervisor of the Phd thesis of Mahmoud Fatimatou

"Contrôle des processus de décohérence en physique quantique"

Supervising DESA thesis

Supervisor of Diploma thesis (DESA) of N. Hassani

"Etats cohérents et intelligents for des algèbres de Lie " (2005).

Supervisor of Diploma thesis (DESA) of F. Oufedjikh
"Mécanique quantique supersymétrique en dimensions supérieures" (2005).

Supervisor of Diploma thesis (DESA) of J. Maher
"Géométrie des états cohérents et produit de Moyal" (2005).

Supervising Master thesis

Supervisor of the Master thesis of R. Essaber
"Corrélations quantiques en théorie quantique de l'information" (Rabat 2012)

Supervisor of the Master thesis of M. El Banany
"Méthodes géométriques pour l'étude des corrélations quantiques" (Rabat 2012)

Supervisor of the Master thesis of T. Charki
"Transitions de phase quantique et ordres topologiques" (Rabat 2012)

Supervisor of the Master thesis of W. El Kaydi
"Champs quantiques sur des espaces non commutatifs" (Rabat 2012)

Supervisor of the Master thesis of H. El Oulji
"Géométrie non commutative et applications en la physique du graphène" (Rabat 2012)

Editor-Referee

Member of editors advisory panel of Journal of Physics A: Mathematical and Theoretical.

Member of editorial board of Journal of African Journal of Mathematical Physics.

Referee for Journal of Physics A: Mathematical and Theoretical.

Referee for Journal of Physics B: Atomic, Molecular and Optical Physics.

Referee for Journal of Mathematical Physics.

Referee for Physica A.

Referee for Physics Letters A.

Reviewer for Mathematical Reviews.

Positions

Associate member of International centre for Theoretical Physics (ICTP), Trieste, Italy (2010-2014).

Invited Professor at Max Planck Institute for the Physics of Complex Systems (several times).

Invited Professor at University Claude Bernard Lyon 1, France (several times).

Associate researcher at Centre de recherches mathématiques, Montréal, Canada(2000).

Memberships

Coordinator of GNDR-IQ (Groupement National De Recherches-Information Quantique).

Vice president of Moroccan Society of Mathematical Physics.

Member of national steering committee of RHEMAP: Réseau National de Physique des Hautes Energies et Physique Mathématique.

Member of the International Association of Mathematical Physics.

Member of the editorial board of African Journal of Mathematical Physics.

Member of RENAPT: Réseau National de Physique Théorique,(1999-2004).

Member of GNPHE: Groupement national de Physique des Hautes Energies.

Expertise

Expert for CNRST (Centre National de la Recherche Scientifique et Technique)-Morocco.

Expert for CONICYT, la Comisión Nacional de Investigación Científica y Tecnológica (Chile)

Expert for National Research Council (CNCS)- Roumania

Organisation of National and International Meetings

Ecole Nationale de Physique quantique, (Rabat les 27-28-29 Octobre 1999):
Etats cohérents: Aspects géométriques et algébriques.

Premier Workshop de Physique Théorique Organisé par le réseau national de physique théorique (RNPT);
Faculté des sciences, Rabat, Maroc, 16-17/06/2000
"la géométrie non commutative la théorie des supercordes la physique des particules"

Ecole Nationale "Symétries en physique", (Rabat les 01-03 Décembre 2002).

Rencontre Nationale de RENAPT (Tanger, 24-26 May 2004).
Etats Cohérents et Applications, Phénoménologie du MSSN et QCD, Géométrie Non-Commutative.
Tanger 27 - 29 Mai 2004.

The International Conference on High Energy and Mathematical Physics (Marrakech, 04-07 April 2005).

International colloquium in Mathematical Physics: Non commutative geometry, Symmetries and String theory (Errachidia, 01-03 June 2006).

Rencontre National des Jeunes Chercheurs de Physique (Casablanca, 19-20 December 2006).

12th Workshop on High Energy and Mathematical Physics (Rabat, 17-18 April 2007).

13th Workshop on High Energy and Mathematical Physics (Rabat, 29-31 May 2008).

International Conference: Quantum information theory and related topics (first edition organized by Groupement National de Recherches-Information Quantique)(Agadir, 03-06 October 2010).

International Conference: Quantum information theory and related topics (second edition organized by Groupement National de Recherches-Information Quantique) (Rabat, 13-16 November 2011).

Ecole Nationale: Théorie Quantique de L'Information: Fondements et Applications (Rabat, 30 November and 01 December 2012).

International Collaborations

Institut de Physique Nucléaire, Université de Lyon, (Contacts: J. Meyer, M. Kibler et F. Gieres).
Project: Fractional Supersymmetry, exotic quantum statistics and Bose Einstein condensation.

Institute of Low Temperature and Structural Research, Polish Academy of Sciences in Wroclaw, Poland (Contact: J. Sztucki).

Project: Two photon absorption for ions embedded in crystals.

Centre de Recherches Mathématiques, Université de Montréal, Montréal, Québec, Canada (Contact: V. Hussin).

Project: Coherent and intelligent states minimizing Robertson-Schrödinger uncertainty relation.

Université Denis Diderot Paris 7, France (Contact: J.P. Gazeau).

Project: Coherent states for fractional spin systems and generalized Grassmann variables.

Département de Mathématiques Université de Caen, France (Contact: A. Nitaj)

Project: Secure quantum communications and quantum algorithms.

Max Planck Institute for Complex Systems, Dresden, Germany (Contact: R. Mossener).

Project: Edge states in quantum Hall systems: algebro-geometric approaches.

Lakehead University, Department of Physics, Canada (Contact: Hubert de Guise).

Project: Phase operators and phase states, Hadamard transformations for quantum information and quantum computing.

University Politehnica, Timisoara, Roumania (Contact D. Popov).

Project: Coherent states for exactly solvable Hamiltonians.

Departament d'Estructura i Constituents de la Matèria, Universitat de Barcelona, Spain (Contact: J.I. Latorre).

Project: Quantum computation and mutually unbiased bases.

International Centre for Theoretical Physics, Trieste, Italy (Contact: Condensed matter section)

Project: Quantum information theory (project conducted by M. Daoud as ICTP regular associate)

ICTP Regional Network : Novel Approaches to Mesoscopic Phenomena (with scientists from Armenia, Brasil, Turkey and Morocco).

National collaborations

Université Mohammed V, Laboratoire de physique des hautes énergies, modélisation et simulation. (Contacts: E. H. Saidi, R. Ahl Laamara).

Projet: Corrélations quantiques et processus de contrôle de la décohérence des systèmes quantiques.

Université Hassan II-Mohammédia, Faculté des Sciences, Laboratoire de physique quantique. (Contact: M. Bennai).

Projet: Phénomènes d'intrication dans la matière condensée.

Université Hassan II-Mohammédia, Faculté des Sciences et Techniques, Laboratoire de cryptographie. (Contact: N. Fahsi).

Projet: Codes correcteurs d'erreurs en information quantique.

Université Hassan II-Ain chock, Ecole Normale Supérieure. (Contact: A. Azhari).

Projet: Cryptographie conventionnelle et protocoles cryptographiques quantiques.

Université Moulay Ismail, Laboratoire de Physique Mathématique (Contact: E. H. El Kinani)
Projet: Développement et sécurité de nouveaux protocoles quantiques.

Université Ibn Tofail, Laboratoire de Physique du Rayonnement (Contact: J. Zerouaoui).
Projet: Supersymétrie fractionnaire et algèbres déformées.

Université Chouaib Doukkali, El jadida (Contact: A. Jellal)
Projet: Nouvelles approches pour les phénomènes mesoscopiques.

Université Kaddi Ayyad, Marrakech (Contact: Y. Attouarti)
Projet: Systèmes atomiques pour la physique de l'information.

Université Moulay Slimane, Beni Mellal (Contact: E.B. Choubabi)
Projet: Quantification des corrélations quantiques dans les systèmes d'états cohérents.

Réseau National de physique des hautes énergies et physique mathématique.
Projet: Champs, Symétries et Particules.

Groupement National de recherches-information quantique:
Projet: Aspects théoriques et mathématiques de l'information quantique et applications en cryptographie et communications quantiques.

Electromagnetic Excitations of Hall Systems on Four Dimensional Space.
Inter. Jour. of Geometric Methods in Modern Physics 8 (2011) 1465.
- 64. M. Daoud** and H. Ez-zahraouy
Three dimensional quantum key distribution in the presence of several eavesdroppers
Physica Scripta **84** 045018 (2011).
- 65. M. Daoud** and E. B. Choubabi
Entangled phase states via quantum beam splitter
Optics Communications 284 (2011) 4535.
- 66. M. Daoud** and E. H. El Kinani
Extended Weyl–Heisenberg algebra, phase operator, unitary depolarizers and generalized Bell states
Physics Letters A **375** (2011) 2492.
- 67. M. Daoud**, A. Jellal, E. B. Choubabi and E. H. El Kinani
Bipartite and tripartite entanglement of truncated harmonic oscillator coherent states via beam splitters
J. Phys. A: Math. Theor. **44** (2011) 325301.
- 68. M. Daoud** and M. Kibler
Phase operators, phase states and vector phase states for SU_3 and $SU_{2,1}$
J. Math. Phys. **52** 082101 (2011)
- 69. M. Daoud** and H. Ez-zahraouy
Quantum encoding based on optical phase states and mutually unbiased bases in the presence of several eavesdroppers
Journal of Russian Laser Research **33** (2012) 20.
- 70. M. Daoud** and E. B. Choubabi
Bipartite entanglement of multipartite coherent states using quantum network of beam splitters
International Journal of Quantum Information **10** (2012) 1250009.
- 71. A. Jellal**, A. El Mouhafid and **M. Daoud**
Massless Dirac Fermions in Electromagnetic Field
Journal of Statistical Mechanics: Theory and Experiment (2012) P01021.
- 72. M. Daoud** and M. Kibler
Bosonic and k -fermionic coherent states for a class of polynomial Weyl-Heisenberg algebras
J. Phys. A: Math. Theor. **45** (2012) 244036.
- 73. M. Daoud** and M. Kibler
Generalized coherent states for polynomial Weyl-Heisenberg algebras.
AIP Conference Proceedings 1472, 60 (2012).
- 74. M. Daoud** and R. Ahl Laamara
Quantum discord of Bell cat-states under amplitude damping

J. Phys. A: Math. Theor. **45** (2012) 325302.

75. M. Daoud and R. Ahl Laamara Quantum discord for multipartite coherent states interpolating between Werner and Greenberger-Horne-Zeilinger states
International Journal of Quantum Information **10** (2012) 1250060.

76. M. Daoud and R. Ahl Laamara
Geometric Measure of Pairwise Quantum Discord for Superpositions of Multipartite Generalized Coherent States
Phys. Lett. A **376** (2012) 2361.

77. M. Daoud, R. Essaber and R. Ahl Laamara
Geometric quantum discord for multi-mode even and odd Glauber states.
Accepted for publication.

78. M. Daoud, W. Kaydi and R. Ahl Laamara
Entanglement in n -partite coherent states interpolating between W_n and GHZ_n states.
Accepted for publication.

79. M. Daoud and H. Ez-zahraouy
Higher dimensional quantum key distribution encoded in optical states and mutually unbiased bases.
Accepted for publication.

80. M. Daoud and M. Kibler
Phase states and coherent states for generalized Weyl-Heisenberg algebras.
Accepted for publication.
